

## **June 2018**

It is officially summer time here at Buck Ridge! We have been blessed with timely moisture during the month of June to help offset the above average temperatures we have had this year. We spent the first half of the month finishing up the first cutting of our hay crop. We successfully put up around 1,300 round bales with minimal issues and good quality forage. The cowherd is looking great after all the calves have been weaned and are enjoying the lush grass while they pack on a few extra pounds. It is hard to believe that calving season is just around the corner, but we are eager to see the new crop. We are putting the last few touches on the grazing and water system at the Hartville farm and have already put it into production. The cows and pasture are looking great! Our next project will be to install a similar grazing and water system at the new Mansfield farm. We are hoping to have this done before the fall calving season. As always, we welcome your call or visit anytime. We would love to show you around. BR 7/3/18
